YOUR WAY TO KILLING BEAUTY

There is a wide choice of skincare products for problem acne-prone skin in various price segments. Consumers are looking for more and more advanced and effective products to resolve the problem. And they more focused on gentle formulations with preferably natural active ingredients.

Acne is a most common skin problem. And it becomes more and more relevant not only in the puberty, but also in adulthood.

According to Market Research Future, the global growth of the anti-acne skincare segment is expected to reach 5% in 2019-2023.

interest in the segment

Inflammation and acne cause psychological discomfort:

- *Low self-esteem*
- *Persistent stress*
- *Feeling embarrassed and ashamed*
